

DO YOU NEED A DEGREE?

Whilst both routes lead to the same place, taking the apprenticeship route has more benefits...

- No student debt
- Begin your career progression from day one
- Gain industry skills in a relevant role

The sky is the limit in apprenticeships, the only limitation is your desire and ability to work hard.

“ I changed my mind at the last minute regarding university and I haven't regretted the decision at all. I have no debt, a salary that increases and valuable real life knowledge of working in the industry.

You don't need a degree to go far! ”

Danielle Williams, Wilkins Kennedy, Newbury
